Testimony of Dr. Edward Sarisley before the Energy and Technology Committee
In Support of SB570, An Act Concerning Electric Savings And Fixed Bill Fees,
and related bills capping the fixed charge for customers of electric distribution companies

Submitted by
Dr. Edward Sarisley, Professor
March 2, 2015

Senator Paul Doyle, Representative Lonnie Reed, and distinguished members of the committee:

I am writing to support passage of legislation that would lower and cap the fixed charge for electric service for residential customers at \$10 per month and for small business customers at \$25 per month. Connecticut's residential customers now pay the highest (\$19.25/month; Ever source) and second highest (\$17.25/month; UI) monthly fixed charge for any major electric utility in the region. Ever source's Connecticut small business customers have seen fixed charges jump nearly 80% since 2007 (increasing from about \$25/month to \$44.50/month).

Higher fixed charges work against the state's commitment to energy efficiency and solar programs, slow the growth of a green jobs economy, and hit hardest those who can least afford to pay.

High fixed charges for electricity are unfair and regressive.

High fixed charges interfere with energy efficiency and clean energy goals.

Thank you for your consideration.

Sincerely,

Edward Sarisley, Ph.D., P.E., F.ASCE, M.NSPE
Professor, Construction Management
